My Background

I am Danyal khan a full-stack web developer.
After completing my matric(Grade 10th) from student model school(SMS) Akora khattak i went to Government post graduate college(GPGC) Nowshera and i did FSC(Grade 12th) from there. After that i learned Graphic designing from academy(Global-age) after that i did internship with a service base company(grow-step technologies) as a graphic designer. But my dream was to become a coder so i started learning web development since from october 2022. And now i have approximetly 1 year of experience and i am able to create a Fully Legit website. And with the help of my graphic designing skills i can create amazing web-pages with great UI's.That's why i also started freelancing on Upwork, fiverr etc..

PROJECTS

Creative-design-website
Name: Future-tech | 02/2023

This is best website design
The UI of this website is quite good.
You can see the website by the link https://designed-by-danyal-khan.netlify.app/

Nasheed-music-web-application
Name: dani-spotify | 05/2023

I make this application using javasript the most
This is a music app containg some nasheeds and it is a user friendly
You can experience it by typing danimusic.netlify.app or directly by the link https://danimusic.netlify.app/

Wheater-checker-web-application
Name: my wheather checker | 06/2023

I make this application using rapid API.
This is the application where you can check weather of any city at any time and the results are 99.9% accurate because of rapid API.
You can see the weather of your city https://wheather-of-everycity.netlify.app/

You can easily check my projects in my portfolio website https://cwdanii.netlify.app/
